Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 17-24, 26-47 and 49 drawn to a method of drug delivery,
compositions of polymerizable material and a system for drug delivery
classifiable in class 424, subclasses 78.17 and 280.1.
- II. Claims 25, 27-40, 48 and 49 drawn to a method of tissue engineering,
compositions of polymerizable material and a system for tissue
engineering classified in class 424, subclass 78.17 and 280.1.

The inventions of Group I and II are distinct because they have different functions, comprise different compositions and employ different methods to achieve different ends.

Upon election of group I or II claims 1-16 will be examined with regard to the scope of the claimed invention.

Claims 27-40 and 49 link(s) the inventions of Group I and Group II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), 27-40 and 49 claim. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s)

depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Upon the election of Group I an election of species is also required. Group I is drawn to the patentable distinct species: diagnostic agents and therapeutic/prophylactic agents (see claim 17). Applicant must select either diagnostic agents or therapeutics/prophylactic agents for further prosecution on the merits. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

It is further noted that number a number of bioactive agents or drugs are disclosed in the specification intended for use in combination with the invention(s) of Group I (see paragraph bridging page 11 and 12). The agents or drugs fall into the following patentable distinct species: Proteins, antibodies, DNA encoding proteins, oligonucleotides, and small organic molecules.

E. L. G.

Upon election of Group I applicant is further required under 35 U.S.C. 121 to elect a single disclosed species from the group: proteins, antibodies, DNA encoding proteins, oligonucleotides or small organic molecules for prosecution on the merits.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
